Thanks Brock, I'll take a look at this presentation before we head up.

Here's a draft so you have the background and context. Nancy is going to do the presentation. I'll probably answer some questions if they come up but only since I'm the one that has actively followed the issue as it relates to HHC.

Thanks for the heads up on implementation and we can be prepared to chime in as necessary. Region 5, in particular, has done the most with variances.

Sounds like a good plan to me.

Some of the harder questions are going to come from industry and relate to implementation issues. We have a presentation that touches on variances and intake credits but since these are new tools to us, we may look to EPA for some insight into Oregon's experience. I understand that variances are well used in certain other regions (3?) but not historically in R10. Don't want to polarize the room- just provide information and context into the complexity of the issue.

Thx

Thanks Brock, I totally understand. When I discuss the slides on our 304(a) updates, I'll definitely avoid rehashing the elements of the equation itself and focus only on what has changed in EPA's recommendations. I can see you plan to cover that sufficiently in your presentation.

I see slides 2-5 taking about 50% of the time we plan to present and 50% for the rest of the time to cover the NTR/304(a) updates. So, I'd approximate 10 minutes on each of those two categories, leaving 10 minutes for Q & A, if that sounds good. I'll keep you posted if Angela has additional thoughts/edits.

Also, thanks for all the restaurant recommendations in Anchorage. That's very helpful as it will be my first visit without just passing through. Looks like I should plan on spending another couple days!

Thanks for sending this Matt. The only comment I have is that several of the slides are formula-specific and I plan to address some of the same material in my own presentation (attached). Does not mean that you should not include that information-especially slide 15, but it would be good to focus on the material in slides 2-4 as the experience of other states is likely to inform our own efforts.

If you get in early enough for dinner on Wednesday you may think about this:

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Brock

Hi Brock,

Sorry I'm a bit late in getting this to you, but I wanted to share a draft of our presentation as soon as possible. Angela has not yet had the opportunity to review, but I thought I would send this to you now to make sure I am hitting the mark. We may make some minor changes after Angela reviews, but please let me know if you have comments or alterations to the items we plan to cover in the meantime.

Thanks!
